

Nursling C of E Primary School Travel Plan

'Working Together for Safe and Active Travel'

Nursling CofE Primary School work with Hampshire County Council to encourage alternatives to car travel on the school run. By encouraging walking, cycling, scooting or using public transport for school journeys we aim to help reduce congestion and pollution. With less traffic the local area should become a nicer place to live and learn.

Our 'Travel Plan' aims to do the following

- Assist with decreasing school gate congestion and associated safety issues
- Improve the health and wellbeing of pupils, parents and staff
- Improve the air quality around the school
- Provide good evidence for funding bids for infrastructure works from travel planning activities
- Improved relations with local community e.g. residents regarding parking issues
- Improved travel and access information
- Increase in walking and cycling levels to reduce the school's carbon footprint
- Improvement in road safety awareness
- Evidence for aspects of the Healthy Schools and other curriculum areas

The School Travel Plan is designed to promote considerate parking around the school at drop-off and pick-up times, encourage more children to walk to and from school and to make walking to school safer.

The School Travel Plan team consists of key members of staff, Junior Road Safety Officers (JRSOs), School Travel Plan Advisors from Hampshire County Council, our local PCSO, governors and parents.

Parents, we ask that you please have a look at the following:

- Nursling Travel Policy
- Park and Stride Map
- Walk to School Kit Leaflet
- Zig Zag Leaflet
- Park wise Leaflet
- How Could You Travel to School? Leaflet

We regularly update the JRSO information that you can find on the schools webpage under the section labelled Pupil Power

We hope everyone will work together to make the area around Nursling C of E Primary a safe and pleasant place to be!
